B.Tech. Degree VI Semester Examination April 2019

ME 1605 CAD/CAM (2012 Scheme)

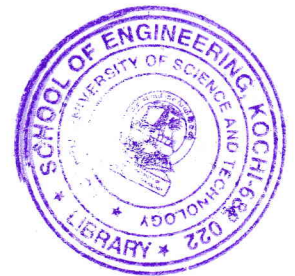

Time : 3 Hours

Maximum Marks : 100

PART A (Answer *ALL* questions)

(8 × 5 = 40)

- I. (a) Write short notes on various softwares used in CAD.
- (b) What is line balancing?
- (c) What are the advantages of CNC over NC controlled machines?
- (d) Explain CANNED cycle.
- (e) What are the various work holding devices used in CNC machines?
- (f) What is the significance of ATC?
- (g) Write down the applications of Robots.
- (h) Define accuracy and repeatability.

PART B

(4 × 15 = 60)

- II. (a) What are the various levels of automation? Explain them in detail. (10)
- (b) With a neat sketch, explain solid modeling. (5)
- OR**
- III. Explain the various transfer machines with sketches. (15)
- IV. (a) Explain open loop and closed loop system. (8)
- (b) What are the various transducers used in CNC? Explain. (7)
- OR**
- V. Explain manual part programming, CAPP and APT programming in detail. (15)
- VI. (a) Briefly explain the classifications of CNC machine tools. (10)
- (b) Write note on APC. (5)
- OR**
- VII. (a) Explain static and dynamic errors. (6)
- (b) What are the various methods of testing a NC machine tool? (9)
- VIII. What are the various classifications of robots? (15)
- OR**
- IX. (a) What is FMS? Briefly explain FMS. (8)
- (b) Explain about the various sensors used in robots. (7)
