

B.Tech. Degree IV Semester Regular/Supplementary Examination June 2024

IT 19-204-0405 INTERNET PROGRAMMING (2019 Scheme)

Time: 3 Hours

Maximum Marks: 60

Course Outcome

On successful completion of the course, the students will be able to:

- CO1: Illustrate the essentials of web and application servers.
- CO2: Design interactive web page(s) using HTML and JavaScript.
- CO3: Transfer XML documents using schemas and Query languages.
- CO4: Develop dynamic web site using client side/server side scripting languages.
- CO5: Demonstrate internet application with AJAX Programming and Ruby on Rails.

Bloom's Taxonomy Levels (BL): L1 – Remember, L2 – Understand, L3 – Apply, L4 –Analyze, L5 – Evaluate, L6 – Create

PO – Programme Outcome

PART A (Answer ALL questions)

(8 × 3 = 24)

	Marks	BL	CO	PO
I. (a) Write a short note on W3C and Web 2.0.	3	L2	1	1,12
(b) With an example, explain the use of XML Namespaces.	3	L4	3	1,2,12
(c) Explain the process of creating, retrieving and deleting cookies in PHP.	3	L2	4	1,2,12
(d) State whether each of the following is true or false. Explain why? (i) The variable name is case-sensitive in PHP. (ii) PHP is an open source software. (iii) The ability to combine embedded JavaScript code and JavaScript source files in a single web page is advantageous if you have multiple web pages.	3	L2	2	1,12
(e) Illustrate a password validation program using PHP with the following conditions: (i) A Lowercase Letter. (ii) An Uppercase Letter. (iii) A Number. (iv) Minimum eight characters.	3	L6	4	1,2,3,12
(f) Indicate basic implementation of the trim() and chop() functions in PHP.	3	L5	4	1,12
(g) What is AJAX? Explain its working with the help of a suitable diagram.	3	L5	5	1,2,12
(h) Describe the key features and characteristics of objects within the Ruby language.	3	L4	5	1,12

(P.T.O.)

PART B

(4 × 12 = 48)

Marks BL CO

- II. (a) Write a HTML code to display the names of any three movie names in English and Hindi languages in an ordered manner. 2 L3 2 1,2,12
- (b) Modify the given HTML page dynamic with PHP. 10 L3 2 1,2,5,12

BY ACKNOWLEDGING AND SIGNING BELOW, I AM DELIVERING AN ELECTRONIC SIGNATURE THAT WILL HAVE THE SAME EFFECT AS AN ORIGINAL MANUAL PAPER SIGNATURE. THE ELECTRONIC SIGNATURE WILL BE EQUALLY AS BINDING AS AN ORIGINAL MANUAL PAPER SIGNATURE.

OR

- III. (a) Describe the basic syntax rules of XML. 4 L2 1 1,2,12
- (b) What are the differences between HTML and XML? 2 L2 2 1,12
- (c) What is DTD? 1 L3 3 1,2,12
- (d) Create valid and well-formed XML document with DTD. 5 L3 3 1,2,5,12

- IV. (a) Create a web page using HTML and JavaScript for reading numbers from 1 to 7 from the user and print the day's name in the week corresponding to the number. 7 L4 2 1,2,3,12
- (b) Write a note on DOM Collections. 5 L3 3 1,2,3,5,12

OR

- V. (a) Explain Properties of DOM. 6 L4 3 1,2,12
- (b) Describe methods of document objects and develop code with those methods. 6 L6 4 1,2,12

- VI. (a) Shortly describe string processing in PHP. 8 L4 4 1,12
- (b) Explain regular expressions in PHP. 4 L4 4 1,2,12

OR

- VII. Create two pages Employee.html and StoredData.php. 12 L5 4 1,2,3,5,12
- Employee.html should accept four inputs ID, Employee name, Housename and Place. When the save button is clicked, StoredData. php page should be loaded and all the data inputted in the Employee page should be stored in a table named user_info which resides in the database user. Show an appropriate message should be displayed after inserting the data to the table.

- VIII. (a) Explain how to implement an asynchronous form submission using PHP and AJAX. 4 L3 5 1,12
- (b) Explain the workflow of a typical AJAX request involving PHP and MySQL. How does data flow between the client, server and database? 8 L5 5 1,12

OR

- IX. (a) Describe the process of creating a database-driven web application using Ruby. Include key components, frameworks and tools typically used in this process and explain how Ruby facilitates database interactions. 8 L5 5 1,12
- (b) What are DRY and CoC? 4 L3 5 1,12

Blooms's Taxonomy Level's

L1 - 2.5%, L2 - 10%, L3 - 25.83%, L4 - 25.83%, L5 - 28.33%, L6 - 7.5%.
