

SCHOOL OF ENGINEERING, CUSAT

DIVISION OF CIVIL ENGINEERING

B.Tech Degree Sixth Semester Second Internal Examination May 2024

A BATCH

19-201-0601 ENVIRONMENTAL ENGINEERING-I (2019 Scheme)

Time: 2 Hours

Maximum: 30 Marks

On completion of the course the students will be able to

CO3	Demonstrate knowledge on sanitary plumbing systems, design of sewerage systems and distribution systems in water supply Engineering
CO4	Recognize various natural methods of waste water disposal and self purification of streams

Part A

(Answer all questions. Each question carries 3marks. 4 x 3= 12marks)

Qno	Questions	Marks	CO
1	Define critical Dissolved Oxygen Deficit?	3	4
2	Explain oxygen sag curve	3	4
3	What are the advantages of Grid Iron System?	3	3
4.	What are the disadvantages of pumping system?	3	3

Part B

(Each question carries 12 marks. 2*12=24 marks)

Qno	Questions	Marks	CO
II	Describe in detail about the different systems of distribution	12	CO3
	OR		
III	Draw the oxygen sag curve and explain about the de-oxygenation and re-oxygenation phenomenon and its effect on self-purification.	12	CO4
IV	Describe in detail with the help of neat sketches the various distribution networks	12	CO3
	OR		
V	Discuss about the advantages and disadvantages of various distribution networks	12	CO3
