B.Tech. Degree I Semester/II Semester Supplementary Examination November 2019

CS/EC/IT GE 15-1101B & CE/EE/ME/SE GE 15-1201A

COMPUTER PROGRAMMING
(2015 Scheme)

Hours

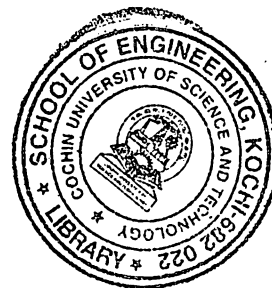

Maximum Marks : 60

PART A (Answer ALL questions)

(10 × 2 = 20)

- I. (a) Differentiate between compiler and interpreter.
 (b) What is application software and system software? Give two examples for each.
 (c) Predict the output of the following code.
- ```
void main()
{
 int i=1,j=2;

 printf("%d %d",++i+j++,i--);
}
```
- (d) Describe formatted input and output functions.  
 (e) Differentiate between call by value and call by reference.  
 (f) Describe enumerated datatype.  
 (g) Write the syntax for declaring a structure.  
 (h) What are command line arguments?  
 (i) What is the difference between sequential and random access in files?  
 (j) What is pointer? Write the syntax for declaring a pointer.

## PART B

(4 × 10 = 40)

- II. (a) Draw the block diagram of a digital computer. Describe each parts. (5)  
 (b) Explain the steps in execution of a program. (5)
- OR
- III. (a) Describe any two design tools of a program. (5)  
 (b) Draw the flow chart for checking a number is odd or even. (5)
- IV. (a) Explain the various looping statements in C with examples. (5)  
 (b) Write the program for finding the factorial of a number using while loop. (5)
- OR
- V. (a) Define datatype. Explain its classification. (5)  
 (b) Write a program to perform arithmetic operations(+,-,\*,/)using switch case. (5)
- VI. (a) Write a program to perform linear search in an array. (5)  
 (b) Write a program to reverse a string. (5)
- OR
- VII. (a) Write a program using functions to find area of a triangle and rectangle. (5)  
 (b) Write a program to perform selection sort on an unsorted array. (5)
- VIII. (a) Write a program to swap two numbers using pointers. (5)  
 (b) Explain dynamic memory allocation in C. (5)
- OR
- IX. (a) Write a C program to copy content of one file to another file. (5)  
 (b) Explain various file handling operations in C. (5)
