

**B.Tech. Degree II Semester Regular and I Semester Supplementary
Examination May 2016**

IT/CS/EC/CE/EE/ME/SE 1106 B / 1206 A ENVIRONMENTAL STUDIES

(2015 Scheme)

Time : 3 Hours

Maximum Marks : 60

PART A

(Answer *ALL* questions)

(10 × 2 = 20)

- I. (a) Explain the significance of landscape changes with respect to food security.
 (b) What are the impacts of over consumption of ground water?
 (c) Differentiate renewable and non-renewable energy sources.
 (d) Discuss on the objectives of Montreal protocol.
 (e) Explain the significance of mega diversity regions of India.
 (f) All the bioaccumulative substances will not undergo biomagnifications. Justify.
 (g) Write down the objectives of Environment Protection Act.
 (h) Explain various impacts of thermal pollution.
 (i) What is meant by unintentionally producing pollutants?
 (j) Substantiate the statement “secondary pollutants are more toxic than primary pollutants”.

PART B

(4 × 10 = 40)

- II. (a) “Unsustainable utilization of NTFPs will cause for forest degradation”. Discuss
 (b) Give your views on sand mining and its environmental impacts.

OR

- III. (a) Briefly explain the role of land use changes in landslide disaster. Suggest mitigation measures for landslides.
 (b) Write a note on the environmental significance of high altitude shola/grassland ecosystems.

- IV. (a) Explain ecological succession with suitable example.
 (b) “Consideration of ecosystem values is highly significant for sustainable development” Discuss.

OR

- V. (a) Explain various causes and consequences of biodiversity.
 (b) Participatory forest management is a very good approach for forest protection and conservation of biodiversity. Explain.

- VI. (a) Write your views on man and animal conflicts in western Ghats region.
 (b) Wild life protection act and forest conservation acts have been influencing forest protection and conservation in India. Justify.

OR

- VII. (a) Are the global actions sufficient for reducing global warming? Write your views.
 (b) Write notes on persistence, bioaccumulation and toxic effect of mercury.

- VIII. (a) Explain various types and health impacts of smog.
 (b) What are the different types of solid waste? Explain municipal waste management.

OR

- IX. (a) Give an account on environmental education in India.
 (b) Biogeochemical cycles are altered by anthropogenic activities. Justify the statement.
