

Experiment : 5

AREA OF TRIANGLE AND RECTANGLE

AIM

To write a program to calculate and display the area of triangle and rectangle

ALGORITHM

1. Start
2. Input variables
3. Enter base and altitude of triangle
4. $T_{area} = \text{base} * \text{area} * 0.5$
5. Print T area
6. Enter length and breadth of rectangle
7. $R_{area} = \text{length} * \text{breadth}$
8. Print R area
9. Stop

RESULT

C program to compute and display the area of triangle and rectangle was compiled.

OUTPUT

Enter the base and altitude of triangle 4 16

The area of triangle is 12

Enter the length and breadth of rectangle 6 8

The area of rectangle is 48
