TO CREATE A CALCULATOR USING SWITCH

AIM

To create a program which can perform basic calculations using switch statements

ALGORITHM

0. Start
1. Read variables a, b, c, x
2. Take inputs of the operands and operator
3. Display options to choose operation
 - 3.1 1: Addition
 - 3.2 2: Subtraction
 - 3.3 3: Multiplication
 - 3.4 4: Division
4. Use switch case to check condition corresponding to option chosen
5. Display result according to the operation
6. Stop.

RESULT

Program to perform basic arithmetic calculations was prepared by using switch case.
