

Assignment

- 1. Explain scavenging, its objectives effects and methods with neat sketches**
- 2. Explain with neat sketches fuel systems, Ignition systems, cooling, starting and lubrication systems in IC engines.**
- 3. Explain different governing methods used in IC engines**
- 4. Explain supercharging, turbo charging of SI and CI engines**
- 5. Explain emissions from IC engines**
- 6. Explain Wankel engines and stratified charged engine**
- 7. Explain automotive transmission systems and its components**
- 8. Explain with neat sketches working of**

I. Power steering

ii. Automatic transmission (Dual Clutch, AMT,CVT)

iii. power brake

iv VVT Technology

v Common rail diesel engine

vi MPFI engine

vii. Catalytic converter

viii. Submarine propulsion
