

B. Tech Degree IV Semester (Supplementary) Examination January 2011

ME 406 MANUFACTURING PROCESS (2006 Scheme)

Time : 3 Hours

Maximum Marks : 100

PART – A (Answer ALL questions)

(8 x 5 = 40)

- I. (a) What are the desired properties of Moulding Sand?
(b) Explain elements of gating system.
(c) Explain die casting.
(d) What are the advantages of centrifugal casting?
(e) Differentiate between hot extrusion and cold extrusion.
(f) What is 'Spinning' operation in Sheet metal?
(g) Explain gas welding process.
(h) What are the common welding defects?

PART – B

(4 x 15 = 60)

- II. Explain different types of patterns used for casting. Also describe pattern allowances.

OR

- III. What is Coves? How it is prepared and fixed? What are the different types of Coves?

- IV. Explain various casting defects in detail.

OR

- V. What is shell moulding? Explain the process in detail.

- VI. What are the advantages of forging operation? Explain different types of forging.

OR

- VII. Explain the merits and demerits of hot working and cold working.

- VIII. Describe different types of Resistance Welding.

OR

- IX. Write notes on :

- (i) Brazing
(ii) TIG welding
