B.Tech. Degree III Semester Examination November 2014

CS/IT 1304 OBJECT ORIENTED PROGRAMMING (2012 Scheme)

Time : 3 Hours

Maximum Marks : 100

PART A (Answer *ALL* questions)

(8 × 5 = 40)

- I. (a) Write the advantages of Object Oriented Programming.
 (b) Explain function overloading.
 (c) Describe static members of a class.
 (d) Explain data hiding.
 (e) What is virtual base class? Explain the working of constructors in virtual base class.
 (f) Write short notes on new and delete operators.
 (g) Write a program to overload any unary operator.
 (h) Explain exception handling.

PART B

(4 × 15 = 60)

- II. (a) Compare procedure oriented and object oriented programming languages. (5)
 (b) Describe goto, break, continue and return with suitable examples. (10)
- OR**
- III. (a) Explain the key concepts of object oriented programming. (10)
 (b) Differentiate call by value and call by reference. (5)
- IV. (a) Explain friend function. (5)
 (b) Write a program to display prime numbers using friend function. (10)
- OR**
- V. Explain the following with example
 (i) Inline functions (5)
 (ii) Copy constructors (5)
 (iii) Constructor overloading (5)
- VI. Define inheritance. With neat diagram, explain different kinds of inheritances. (15)
- OR**
- VII. (a) Write a program to implement multilevel inheritance in bank operations (10)
 [Bank → Account → Client]
 (b) What is 'this' pointer? Explain the uses of 'this' pointer with example. (5)
- VIII. (a) Explain the use of class templates with an example. (10)
 (b) List any five string handling functions with syntax. (5)
- OR**
- IX. (a) Explain virtual functions. (5)
 (b) List different file opening modes and explain file manipulators with example. (10)
