B.Tech. Degree VI Semester Examination April 2019**CS 15-1601 COMPUTER NETWORKS**
(2015 Scheme)

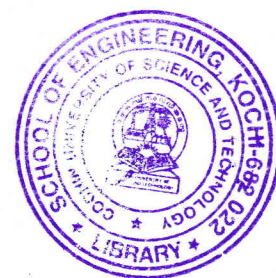

Time: 3 Hours

Maximum Marks: 60

PART A(Answer *ALL* questions)

(10 × 2 = 20)

- I. (a) Write a note on P2P file sharing.
(b) Explain the method of accessing a webpage while typing a URL on the browser.
(c) What is the need of RPC?
(d) Differentiate between TCP and UDP.
(e) Why does need reliability at data link layer as well as transport layer?
(f) What is the difference between virtual circuit and datagram networks?
(g) Explain IPV4 packet format.
(h) Differentiate ISDN and BISDN.
(i) Compare circuit and packet switching.
(j) Write a note on frame relay.

**PART B**

(4 × 10 = 40)

- II. Explain TCP/IP reference model with suitable diagram. (10)
OR
III. Explain the following protocols (10)
(i) HTTP (ii) FTP (iii) SMTP
- IV. Explain TCP segment structure with connection establishment and termination. (10)
OR
V. What is congestion? Explain the various congestion control techniques. (10)
- VI. (a) Explain IP fragmentation. (5)
(b) Explain in detail the services of the Network layer. (5)
OR
VII. Explain link state and distance vector routing algorithm with example. (10)
- VIII. What is the need of sliding window protocols and explain various sliding window protocols? (10)
OR
IX. Write a TCP socket programming for client server communication. (10)
