

B.Tech. Degree VIII Semester Examination April 2017

CS 1804 (E2) DATA MINING (2012 Scheme)

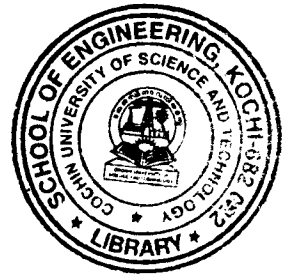

Time: 3 Hours

Maximum Marks: 100

PART A (Answer *ALL* questions)

(8 × 5 = 40)

- I. (a) Differentiate data warehousing and OLAP.
 (b) Compare supervised and unsupervised learning.
 (c) Differentiate agglomerative and divisive hierarchical clustering.
 (d) Explain rule based algorithm.
 (e) What is time series analysis?
 (f) What are support vector machines?
 (g) Write a short note on ensemble technique.
 (h) What is WEKA?

PART B

(4 × 15 = 60)

- II. What are the steps involved in data mining process? (15)
OR
 III. Explain CRISP-DM approach. (15)
 IV. Discuss the categorization of major clustering methods. (15)
OR
 V. Explain any two data mining techniques. (15)
 VI. Explain briefly statistical approaches in data mining. (15)
OR
 VII. (a) Explain naive bayes classifier. (7)
 (b) Explain principal component analysis. (8)
 VIII. Discuss web mining in detail. (15)
OR
 IX. Describe spatial mining in detail. (15)
